Data_Visualization_Assignment1

DataSet - SalesDataset

Instructions

- Download the dataset from the above link.
- Load it into Power BI.
- If the dataset headers appear in the first row, select **"Use first row as headers"** in Power Query.
- Perform each question's task using **Power BI visualizations**.
- Use **DAX** where necessary.
- Read the dataset carefully before starting.

Tasks

Q1. Monthly Sales Trend by Region

Task: Create a line chart showing the total revenue per month for each region in 2023 only.

Q2. Top 5 Salespersons by Revenue

Task: Create a bar chart to display the top 5 salespersons based on total revenue in 2022 and 2023 combined.

Q3. Sales by Product Category and Channel

Task: Create a stacked column chart to show revenue by category, segmented by sales channel.

Q4. Year-over-Year Revenue Change %

Task: Create a card visual to show the percentage change in revenue from 2022 to 2023.

Q5. Discount Impact on Revenue

Task: Create a scatter plot comparing average discount vs. total revenue by product.

Q6. Category Contribution to Total Revenue

Task: Create a donut chart showing each category’s share of total revenue.

Q7. Revenue Heatmap by Month and Region

Task: Create a matrix visual showing revenue by month (columns) and region (rows).

Q8. High-Value Orders Identification

Task: Create a table that lists only orders with revenue > 50,000.

Q9.Cumulative Revenue over Time

Task: Create a line chart showing cumulative revenue across months for 2023.

Q10. Sales Channel Performance Over Years

Task: Create a clustered column chart showing revenue per sales channel for each year.
