Data_Visualization_Assignment2

Dataset - Employee_performance_dataset

Instructions

- Download the dataset from the above link.
- Load it into Power BI.
- If the dataset headers appear in the first row, select **"Use first row as headers"** in Power Query.
- Perform each question's task using **Power BI visualizations**.
- Use **DAX** where necessary.
- Read the dataset carefully before starting.

Tasks

1. **Department-wise Average Performance**
   Task: Create a **clustered bar chart** showing the average `PerformanceScore` for each department in 2023 only.

2. **Top 5 Employees by Annual Income**
   Task: Create a **table visual** to show the top 5 employees with the highest `AnnualIncome`.

3. **Training Hours vs Performance**
   Task: Create a **scatter plot** showing the relationship between `TrainingHours` and `PerformanceScore`, categorized by `Department`.

4. **Gender Diversity by Department**
   Task: Create a **stacked column chart** showing the count of employees by `Gender` within each `Department`.
   .

5. **Overtime Impact on Income**
   Task: Create a scatter plot showing `OvertimeHours` vs `AnnualIncome`.

6. **Projects Completed by Performance Category**
   Task: Create a **column chart** showing average `ProjectsCompleted` grouped by `PerformanceScore`.

7. **Bonus Distribution by Department**
   Task: Create a **box plot** (or equivalent workaround) showing `BonusPercent` distribution for each department.

8. **Employee Count Trend Over Years**
   Task: Create a **line chart** showing total number of employees per year.

9. **Identify High Performers**
   Task: Create a table visual showing employees with `PerformanceScore >= 4` and `AnnualIncome > 100,000`.

10. **Education Level Analysis**
    Task: Create a **donut chart** showing the proportion of employees by `EducationLevel`.
